The 'serial killer' has become increasingly prevalent in popular culture since the term was coined by Robert Ressler at the FBI in the mid-1970s. Murders and Acquisitions explores the social and political implications of this cultural figure. The collection argues that the often blood-chilling representations of the serial killer and serial killing offered in TV series, films, novels and fan productions function to address contemporary concerns and preoccupations. Focusing on well-known popular culture texts, such as The Wire, Kiss the Girls, Monster, the Saw series, American Psycho, The Strangers, CSI and Dexter, this eclectic anthology engages with a broad spectrum of cultural theory and performs critical textual analysis to examine the sophisticated ways the serial killer is deployed to mediate and/or work through cultural anxieties and fears.

From award-winning criminologist R. Barri Flowers and the bestselling author of Dead at the Saddleworth Moor, Prostitution in the Digital Age, and The Sex Slave Murders, comes the gripping historical true crime book, The Dreadful Acts of Jack the Ripper and Other True Tales of Serial Murder and Prostitutes. The renowned Ripperologist taps into his expertise on serial murderers and sex trade workers in offering an in-depth look at four noteworthy cases in which the two worlds collide frighteningly. Jack the Ripper, the infamous and unidentified Victorian serial killer of at least five prostitutes in the dangerous section of London, known as Whitechapel, in 1888. The Ripper, who slashed and horribly mutilated his sex worker victims, set the tone for diabolical, vicious, serial slayers to follow for all time. Aileen Wuornos was an American prostitute, who doubled as a serial killer in murdering seven johns in Florida between 1989 and 1990. She claimed they tried to or

succeeded in raping her during the course of prostituting herself. In the process, Wuornos ended up being apropos for this book as a sex worker and serial predator. Kendall Francois was an African American serial killer, dubbed the "Poughkeepsie Killer," who strangled to death eight streetwalker prostitutes in Poughkeepsie, New York, between 1996 and 1998. Francois used his own residence as a horrifying house of homicides and burial ground. The Edmonton Serial Killer represented one or more mostly unidentified serial killers who targeted and murdered dozens of prostitutes in the city of Edmonton in Alberta, Canada, between the mid-1970s and the early 2000s, and possibly beyond that. The sex trade worker victims were often picked up in the city's red-light district stroll, murdered, and dumped in various killing fields in rural areas around Edmonton. The book will also chronicle the infamous and colorful 19th century New Orleans prostitute and serial killer, Mary Jane Jackson, and modern-day American serial killers of prostitutes, Walter Ellis, nicknamed the "North Side Strangler," and Vincent Johnson, dubbed the "Brooklyn Strangler." Included is a bonus true crime short on Douglas Clark and Carol Bundy, a serial killer couple who targeted prostitutes on the Sunset Strip in West Hollywood, California; as well as excerpts from two fascinating historical true tales of child murder, serial murder, and jealous rage. For fans of true crime tales and literary criminology, this gripping volume written by someone with the verisimilitude that the subject matter merits will surely hold your attention from start to finish.

Molecules of Murder is about infamous murderers and famous victims; about people like Harold Shipman, Alexander Litvinenko, Adelaide Bartlett, and Georgi Markov. Few books on poisons analyse these crimes from the viewpoint of the poison itself, doing so throws a new light on how the murders or attempted murders were carried out and ultimately how the perpetrators were uncovered and brought to justice. Part I includes molecules which occur naturally and were originally used by doctors before becoming notorious as murder weapons. Part II deals with unnatural molecules, mainly man-made, and they too have been dangerously misused in famous crimes. The book ends with the most famous poisoning case in recent years, that of Alexander Litvinenko and his death from polonium chloride. The first half of each chapter starts by looking at the target molecule itself, its discovery, its history, its chemistry, its use in medicine, its toxicology, and its effects on the human body. The second half then investigates a famous murder case and reveals the modus operandi of the poisoner and how some were caught, some are still at large, and some literally got away with murder. Molecules of Murder will explain how forensic chemists have developed cunning ways to detect minute traces of dangerous substances, and explain why some of these poisons, which appear so life-threatening, are now being researched as possible life-savers. Award winning science writer John Emsley has assembled another group of true crime and chemistry stories to rival those of his highly acclaimed Elements of Murder.

During the interwar "golden age" of British detective fiction, women writers like Dorothy L. Sayers and Agatha Christie reigned, but their work remains tame compared to today's crime novels. Elements of sexuality and gender, including soft porn and sexual psychopathy, pervade contemporary detective fiction. The 10 essays in this collection explore issues of gender and sexuality in crime writing by women from 1985 to 2011, surveying works about girl sleuths, parodies, hard-boiled detective fiction, police procedurals, and recent serial killer series. They examine the relationship between genre and gender and explore how later works enter into a field of "post-feminism." Most importantly, this volume demonstrates how popular women writers of the last three decades have reconceptualized what it means to be a female detective.
