Calculus With

(called the
"constraints")
to form a walled-
off area on the
 x, y -plane

(called the
"feasibility
region"). Then
you figure out
the coordinates
of the corners
of this
feasibility

Get Free

Applied

Calculus (that is,

you find the

intersection

points of the

various pairs of

lines), and test

these corner

points in the

formula (called

the

"optimization

equation") for

which you're

trying to find
