A letter from a childhood friend to whom she has not spoken in ten years and an odd legacy from her boss, elderly historian Oliver Doucet, sends Cameron on a mission to track down her old friend Sonia and deliver a mysterious package to her.

What began as a public-health project by a Harvard medical student evolved into an intimate, ambitious, six-year study of the brothel ecosystem and a book that puts an unforgettable face on America’s maligned and caricatured subculture. “A fascinating glimpse into a hidden lifestyle.... It’s an instantly gratifying page-turner... It emerges as a personality-filled memoir about an unforgettable group of women.” —Seattle Weekly
Not a single legal prostitute in Nevada had contracted HIV since testing began in 1986. Why? Harvard medical student Alexa Albert traveled to Nevada in search of answers. Gaining unprecedented access to the infamous and notoriously secretive Mustang Ranch, Albert reveals a fascinatingly insular world where the women share their experiences with unexpected candor. There’s Dinah, Mustang’s oldest prostitute, who turned her first trick years ago at age fifty-one. And Savannah, a woman who views her work as a “healing” social service for needy men. Nevada’s legal brothels are an incredibly rich environment for examining some of this nation’s thorniest social issues. From problems of class and race to the meaning of family, honor, and justice—all are found within this complex and singular microcosm. And in a country where prejudice is a dirty word—but not as dirty as hooker—these social issues are compounded and deepened by the stifling stigma that has always plagued the profession. But in the end, all of Mustang’s working girls are just women trying to earn their way to happiness. Brothel is a landmark work that probes beyond the veil of desire and fantasy in which the sex trade shrouds itself—and uncovers the naked humanity at its core.

Haunting, gripping, and psychologically fierce tales that illuminate an unsettling side of humanity from “one of the treasures of American story writing” (Jonathan Lethem). Featuring the O. Henry Prize–winning short story “Windeye,” this collection of Brian Evenson’s masterful stories “involve impossible scenarios and alternative realities” that are “always surprising” (Bookforum). A woman falling out of sync with the world; a king’s servant hypnotized by his murderous horse; a transplanted ear with a mind of its own—the characters in these twenty-five stories live as interlopers in a world shaped by mysterious disappearances and unfathomable discrepancies between the real and imagined, revealing the breadth and depth of Evenson’s uncanny vision.

“There’s a fine line between gossip and history, when one is talking about kings.” Sophie Fitzosborne lives in a crumbling castle in the tiny island kingdom of Montmaray with her eccentric and impoverished royal family. When she receives a journal for her sixteenth birthday, Sophie decides to chronicle day-to-day life on the island. But this is 1936, and the news that trickles in from the mainland reveals a world on the brink of war. The politics of Europe seem far away from their remote island—until two German officers land a boat on Montmaray. And then suddenly politics become very personal indeed. *A Brief History of Montmaray* is a heart-stopping tale of loyalty, love, and loss, and of fighting to hold on to home when the world is exploding all around you. “Once in a while, a special book will cross our paths and make us grateful for life and the ability to read. I’m talking about *A Brief History of Montmaray* by Michelle Cooper. I’m calling her Australia’s next stroke of literary brilliance.”—Viewpoint

Three brothers. Power beyond reckoning. And a terrible betrayal. Adrian De Vere is the most powerful and charismatic politician on the planet. To many he heralds a future filled with peace and prosperity. Jason De Vere controls a third of the world’s media through his communications empire VOX. Brilliant and tenacious, little happens in the world without him knowing. Nick, international playboy (and archaeologist), is dying, a victim of his own recklessness. He has made a remarkable discovery he hopes may save him, but does not know how or what the cost will be. Despite their wealth and fame, the brothers’ family history is shadowed in lies. Now, with powerful forces both sacred and diabolical at play, one will betray the others – in an almost unimaginable way ... “There could be no bigger canvas for film-making.” — Mark Ordesky (Executive Producer – *Lord of the Rings*)
“Alec not only re-frames pre-history, she also imaginatively illustrates how the realm of spirit impacts the contemporary material world.” Ileen Maisel (Executive Producer for the Golden Compass)
“This is the best work of fiction I have read since the last installment of Dean Koontz’ Frankenstein series” Jim McDonald – 1340Mag – Online Entertainment Magazine

Millionaire of the Month: Jack Howington III
Source of Fortune: International security corporation
The woman he can never have: Meredith Palmer
When he arrived at Hunter's Landing,Jack got the surprise of his life. His bestfriend's shy little sister had become breathtaking young woman—with an axto grind. Still smarting over Jack's long-ago rejection, Meredith was now intent onluring the mogul into her bed...and herbed was right across the hall. At what costwould Jack keep a decade-old promise?

The adoption of the Bill of Rights in 1791 marked the creation of a uniquely innovative mechanism for constitutional change by which Americans have continued to renew and redefine their governance over a two-hundred-year period. Now, in time for the bicentennial celebration of this great document, seven distinguished scholars combine their expertise to explore the history and contemporary meaning of these first ten amendments to the Constitution.

This is the digital version of the printed book (Copyright © 1996). Learning the basics of a modeling technique is *not* the same as learning how to use and apply it. To develop a data model of an organization is to gain insights into its nature that do not come easily. Indeed, analysts are often expected to understand subtleties of an organization's structure that may have evaded people who have worked there for years. Here's help for those analysts who have learned the basics of data modeling (or "entity/relationship modeling") but who need to obtain the insights required to prepare a good model of a real business. Structures common to many types of business are analyzed in areas such as accounting, material requirements planning, process manufacturing, contracts, laboratories, and documents. In each chapter, high-level data models are drawn from the following business areas: The Enterprise and Its World
The Things of the Enterprise
Procedures and Activities
Contracts
Accounting
The Laboratory
Material Requirements Planning
Process Manufacturing
Documents
Lower-Level Conventions

Provides comprehensive data and analysis on the environmental performance of agriculture in OECD countries since 1990, covering soil, water, air and biodiversity and looking at recent policy developments in all 30 countries.
