So. Book. It's called No More Dirty Looks by Siobhan O'Connor and Alexandra Spunt. In plain English, bad words and all, the book details what goes into beauty products. This book changed my life because it's a horror book. When people say the truth can be ugly, they have no idea how accurate that statement can be.

No More Dirty Looks | Derby and not so derby

No More Dirty Looks discusses about all the harmful chemicals and ingredients that can be found in our every day products like shampoo, body wash and even skin care. The authors discuss at great length about the FDA and what the FDA does and how major companies get their licensing and its horrifyingly shocking how easy it is for anyone to use a large amount of harmful chemicals in our products.

No More Dirty Looks : Alexandra Spunt : 9780738213965

It incorporates the childhood rhyme, "No more pencils, no more books, no more teachers' dirty looks" into its lyrics. It also featured children contributing some of the vocals. "Innocence" in the lyric "...and we got no innocence" is frequently changed in concert to "intelligence" and sometimes replaced with "etiquette."

It started with a harmless quest for perfect wash-and-go hair. Every girl wants it, and Siobhan O'Connor and Alexandra Spunt finally found it in a fancy salon treatment. They were thrilled -- until they discovered that the magic ingredient was formaldehyde. Shocked, O'Connor and Spunt left no bottle unturned. If it went on their body (and thus, was absorbed into their skin and bloodstream), they researched it. As it turns out, many of those unpronounceable ingredients in your self-tanner and leave-in conditioner are not regulated and the "natural" on your face wash doesn't mean what you think it does. Now, with the help of top scientists, dermatologists, and makeup artists, the authors share their compelling findings and the easy way to detoxify your beauty regimen. No More Dirty Looks also reveals the safest, most effective products on the market and time-tested home recipes. Finally, you don't need to sacrifice health for beauty -- because coming clean is the best look yet.

Most of us don't realize that the products we use every day can expose us to thousands of chemicals that are readily absorbed through our skin. The impact on your health? It's not pretty.

Most of us don't realize that the products we use every day can expose us to thousands of chemicals that are readily absorbed through our skin. The impact on your health? It's not pretty.

It's the last day of school! Gilbert is excited about summer vacation. First there's a class party, and Mrs. Byrd will give out the end-of-the-year awards. But will Gilbert even get one? Patty's the best speller. Philip's the best reader. What is Gilbert best at?

Internationally renowned dermatologist and research scientist Dr. Whitney Bowe presents, for the first time, the connection between a healthy gut and radiant, clear skin, with a 21-day program to maximize skin health and beauty. Every year, nearly 80 million Americans will consult their doctors about their skin. In fact, skin disorders beat out anxiety, depression, back pain, and diabetes as the number one reason Americans see their doctors. Unfortunately, however, the vast majority will receive only a surface-level treatment, leaving the underlying conditions at the root of their skin issues unresolved. Skin doesn't lie; it reflects overall health in unimaginable ways. In *The Beauty of Dirty Skin*, internationally renowned dermatologist and scientist Dr. Whitney Bowe shows readers that skin health is much more than skin deep. As a pioneering researcher on the cutting edge of the gut-brain-skin axis, she explains how the spectrum of skin disorders -- from stubborn acne and rosacea to psoriasis, eczema, and premature wrinkling -- are manifestations of irregularities rooted in the gut. Lasers, scalpels, creams, and prescription pads alone will not guarantee the consistently healthy, glowing skin we all seek. Instead, Dr. Bowe focuses on the microbiome -- where trillions of microbes "speak" to your skin via the brain -- and highlights the connection between sleep, stress, diet, gastrointestinal health, and the health of your skin. With simple explanations of the science, do-it-yourself practical skincare strategies, and a life-changing 21-day program, *The Beauty of Dirty Skin* is your roadmap to great skin from the inside out and the outside in.

Anti-aging products are the fastest growing sector of the cosmetics industry as women and men are becoming rapidly more obsessed with looking and feeling young. Splashy ads and commercials are everywhere we turn, promising to keep our appearances fresh and our partners satisfied. But do consumers really know what they're applying to their faces and bodies in their quests for youth and beauty? Do they know the health risks they're taking by simply applying lipstick, face moisturizer or deodorant? Toxic beauty products clutter the shelves at retail stores everywhere, and consumers don't know the avoidable risks they're taking by following a simple beauty regimen. Written by Dr. Samuel S. Epstein, a founder and chairperson of the Cancer Prevention Coalition, *Healthy Beauty* gives the lowdown on salon safety, health risks hiding in everyday products, how we put our children in danger and more. *Healthy Beauty* will also educate you and your family on easily implemented solutions through the use of a variety of positive alternatives. In *Healthy Beauty*, you will learn: □ How beauty products can affect your children before they're born □ The brutal carelessness producers use when creating products for women and children □ The risks taken when you step into a salon □ Toxins in men's products such as deodorant, cologne and aftershave □ How to protect yourself and your family by reading labels and identifying potentially hazardous ingredients Through the help of Dr. Epstein and *Healthy Beauty*, you can protect yourself from the possible long-term effects of a simple beauty product.

Lead in lipstick? 1,4 dioxane in baby soap? Coal tar in shampoo? How is this possible? Simple. The \$35 billion cosmetics industry is so powerful that they've kept themselves unregulated for decades. Not one cosmetic product has to be approved by the US Food and Drug Administration before hitting the market. Incredible? Consider this: The European Union has banned more than 1,100 chemicals from cosmetics. The United States has banned just 10. Only 11% of chemicals used in cosmetics in the US have been assessed for health and safety - leaving a staggering 89% with unknown or undisclosed effects. More than 70% of all personal care products may contain phthalates, which are linked to birth defects and infertility. Many baby soaps are contaminated with the cancer-causing chemical 1,4 dioxane. It's not just women who are affected by this chemists' brew. Shampoo, deodorant, face lotion and other products used daily by men, women and children contain hazardous chemicals that the industry claims are "within acceptable limits." But there's nothing

acceptable about daily multiple exposures to carcinogenic chemicals -- from products that are supposed to make us feel healthy and beautiful. Not Just a Pretty Face delves deeply into the dark side of the beauty industry, and looks to hopeful solutions for a healthier future. This scathing investigation peels away less-than-lovely layers to expose an industry in dire need of an extreme makeover. 15 percent of the purchase price of each book sold benefits the national Campaign for Safe Cosmetics, administered by the Breast Cancer Fund, through December 31, 2012.
