author until 2015. After their expedition, this volume makes a very interesting turn, directing Radu to spawn special project which attracts a unique collaboration of characters, both from the underground city of Apellos but also with the American side. Also, for the first time in almost 14 years, Radu Cinamar offers us some additional conversations and collaboration with the enigmatic Elinor, the quintessential alchemist, who becomes deeply involved with the new project. The book also presents a key piece of information, long debated and considered until now an unsolved mystery, which refers to the real origin of the Moon. Everything is explained in chronological detail, following up on the elements about the origin of man presented in the previous volume, *Forgotten Genesis*. **THE ETHERIC CRYSTAL** is full of fascinating information that opens the horizons of our knowledge and of our individual evolution.

In this exhilarating description of mysteries inside the Earth, Radu Cinamar presents a unique way to penetrate the Inner Earth through the process of feeling and the effects that will develop from such an experience. To enhance the readers understanding of this very guarded subject, this book includes multiple illustrations that include depictions of Inner Earth geography. Familiar characters from the Transylvania Series also reappear, including the enigmatic Tibetan lama, Repa Sundhi, also known as Dr Xien, who states: If someone had a device or machine that could start up and go everywhere they want, especially towards the centre of the Earth, the machine would be blocked and stop at a certain point because of the frequency of vibration to be found there. Just how far you can go with such a machine can be limited by reason of your own con- sciousness which can in and of

itself restrict the dimensional range of such a device or the extent to which it can penetrate other realms. This applies to both human beings as well as material objects. Your ability to access such a region is determined by what your own individual frequency of consciousness can or will allow you to experience. This is not only the story of an exciting adventure, it is an opportunity for initiation as you explore the frequencies of your own inner nature.

Radu Cinamar's sixth book is about his continued liaison with the Inner Earth civilization Apellos where he views certain key aspects of the history of Mankind by viewing holographic projections which are facilitated by a headset he wears featuring advanced technology that is able to interact with his cerebral cortex and intuition. The result is a compelling tale of how multiple extraterrestrial civilization influenced

New research and evidence that the Sphinx is thousands of years older than previously thought • Contrasts what Egyptologists claim about the Sphinx with historical accounts and new research including reanalysis of seismic studies and updates to Schoch ' s water weathering research and Bauval ' s Orion Correlation Theory • Examines how the Sphinx is contemporaneous with G ö bekli Tepe, aligned with the constellation Leo, and was recarved during the Old Kingdom era of Egypt • Reveals that the Sphinx was built during the

actual historical Golden Age of ancient Egypt, the period known in legend as Zep Tepi No other monument in the world evokes mystery like the Great Sphinx of Giza. It has survived the harsh climate of Egypt for thousands of years and will remain long after our own civilization is gone. According to orthodox Egyptology, the Sphinx was built around 2500 BCE as a memorial to the pharaoh Khafre. Yet this “ fact ” has scant to no supportive evidence. When was the Sphinx really built and, most importantly, why? In this provocative collaboration from two Egyptology outsiders, Robert M. Schoch, Ph.D., and Robert Bauval combine their decades of research to show how the Sphinx is thousands of years older than the conventional Egyptological timeline and was built by a long forgotten pre-Pharaonic civilization. They examine the known history of the Sphinx, contrasting what Egyptologists claim with prominent historical accounts and new

research, including updates to Schoch ' s geological water weathering research and reanalysis of seismic studies. Building on Bauval ' s Orion Correlation Theory, they investigate the archaeoastronomical alignments of the monuments of the Giza Plateau and reveal how the pyramids and Sphinx were built to align with the constellations of Orion and Leo. Analyzing the evidence for a significantly older construction phase at Giza and the restoration and recarving of the Sphinx during the Old Kingdom era, they assert that the Sphinx was first built by an advanced pre-Pharaonic civilization that existed circa 12,000 years ago on the Giza Plateau, contemporaneous with the sophisticated Göbekli Tepe complex. The authors examine how the monuments at Giza memorialize Zep Tepi, the Golden Age of legend shown here to be an actual historical time period from roughly 10,500 BCE through 9700 BCE. Moving us closer to an understanding of the

true age and purpose of the Great Sphinx, Schoch and Bauval provide evidence of an early high civilization witnessed by the Great Sphinx before the end of the last ice age.
