Much of its collection was seeded by Project Gutenberg back in the mid-2000s, but has since taken on an identity of its own with the addition of thousands of self-published works that have been made available at no charge.

The Cremation Furnaces Of Auschwitz

What did exist, though, were cremation furnaces used to turn into ashes the remains of deceased inmates. Survivors claim that thousands of corpses were burned in them every day, and that smoke and flames shot out of the crematory chimneys. The present study investigates the Auschwitz cremation furnaces from the bottom up.

**The Cremation Furnaces of
Auschwitz | CODOH**

The cremation furnaces of Auschwitz, fired by means of coke-fed gasifiers, constituted a development - or rather a simplification - of the civilian types; however (as I found out in the early stages of my work) it is difficult to locate detailed information on these furnaces even in the specialized literature.

The Cremation Furnaces of Auschwitz: A Technical and ...

Crematorium I Crematorium I operated [at Auschwitz] from August 15, 1940 until July 1943. According to calculations by the German authorities, 340 corpses could be burned every 24 hours after the installation of the three furnaces. The largest room in this building was designated as a morgue.

Crematoria & Gas Chambers at Auschwitz-Birkenau

The six ovens were in the main camp known as the Stammlager or Auschwitz 1. These six ovens were housed in a crematorium known as Crema I in much of the literature. In the summer of 1942 the Auschwitz Construction Agency, known as the Bauleitung, started to build four new crematoria in the Birkenau area of the camp, also known as Auschwitz II.
